

Welcome To Pure Prescriptions™

Pure Prescriptions™ specializes in Natural Health Solutions for the entire family. I began Pure Prescriptions as a result from my own personal struggle with cancer at an early age. It immediately became clear to me that there was a need for a single source of reliable, scientific and fact based information regarding optimizing our health. It is now my personal passion to provide higher quality information about how nutrition and meaningful lifestyle changes can positively influence our personal health. Pure Prescriptions has evolved much from our humble beginnings in 2001, yet we will always embrace the the small company and DIY credo, providing the purest products, highest integrity and unmatched customer service.

In response to intense customer demand for all-new health supplements, we have developed the Pure Prescriptions Signature line, IAGEN Biologics™ for Healthcare Professionals, and our newest addition, NewGreens™. These product lines represent the latest scientific research from around the Globe, coupled with the insight and knowledge of Dr. Chad Larson to deliver the highest quality, potency and efficacy available anywhere. Every product is delivered to you with our personal guarantee that you will feel the difference.

Whether you are a Healthcare Practitioner, an individual with health challenges or a person looking to maintain your well being, we believe the more you know about Pure Prescriptions the more you will appreciate what's inside each one of our natural products, the professional advice we offer and the wealth of information now located in your best single source for your health and well being.

Enjoy!

Devin Ryerson, D.C.
CEO and Founder
Pure Prescriptions, Inc.
