

PRODUCT DESCRIPTION

ResVinol-25™ RESVERATROL 25% *trans*-Resveratrol & 20% Red Wine Polyphenols

Botanical Source:	<i>Vitis vinefera; Polygonum cuspidatum</i>
Parts Used:	Grapes (in Red Wine Matrix) & Root
Standardization:	25% <i>trans</i>-Resveratrol/ 20% Red Wine Polyphenols
Analysis:	HPLC & Folin-Ciocalteu
Extract Ratio:	50:1 (approx)
Solvent:	Food-Grade Ethanol and Distilled Water
Excipient:	None
Production:	ENI and audited GMP facility
Certified:	Kosher, Non-GMO, Non-irradiated, ETO-free
Pesticide-free:	USP 561 Pesticide screen
ENI Product Code:	E-RVP-08

Key Product Features:

- > **ResVinol-25™** is a proprietary extract which provides concentrated levels of polyphenols and *trans*-Resveratrol.
- > Standardized on the most biologically active *trans*-isomer.
- > Contains full range of bioactive compounds found in red wine.
- > High potency: one gram of this extract has the resveratrol equivalent to 350 glasses of red wine.
- > Cost effective: the relatively low per kg cost for a resveratrol product allows significant customer benefits at an excellent value.

Recommended Daily Dosage: 320mg per day

Pharmacology and Clinicals (summary): Resveratrol is a polyphenol present in over 70 species of plants, including many fruits and vegetables. Growing numbers of in vivo studies show the extensive therapeutic benefits of resveratrol, including free-radical absorbing activity possibly responsible for its ability to extend the lifespan of various mammals.

Red wine and grape polyphenols are potent antioxidants with beneficial cardiovascular effects. (Complete pharmacology and references available by request).
